

e-Diagnostics Working Group Meeting

Member Company Caucus Feedback

ISMT Member Companies

September 20, 2000

Data Sharing

- MC -> Supplier
- Supplier A -> Supplier B
- Merging multiple data sources
- Classification of data and applying security levels
 - Generic to Specific data elements
 - Need to be configurable
- Configurable security? Emergency takes precedence? User Control (at the tool).
- MC reserves the right to determine what data is shared.
- MC to agree to a “base” set of data available to suppliers.
 - Tactical Data (limited storage lifespan, limited access, etc.)
 - Performance Data.
- Confidential Nondisclosure Agreements

Data Security Leadership

Piero Fioravanti (Intel)
IBM Co-Leader TBD

Proof of concept Implementation

- Share BKM, lesson learned from current industry implementations.
- Taskforce (sharing log files from equip to supplier) Kacey Crowley (Intel), Bill (IBM), Glenn (HP), Greg (from a security perspective AMD) Invite MC distribution list.

Central Point for e-Diagnostics Access?

- **Discuss in the architecture group**
- **Need Supplier Support for eDiagnostics**
 - Infrastructure, security, support, etc.

Great support from Suppliers!
