

1. Title:	Critical issues of EUV resists and new research approach
2. Full names of all authors:	S.Tagawa, T.Kozawa and A.Saeki

3. Abstract body:

We have been studying about the relations of critical issues of EUV resists such as the sensitivity, resolution and LWR(LER) based on both experimental results and theoretical simulation, and then making clear the points of the problems. We propose the new research approach for the critical issues of EUV resists.
